

## Neurosurgeon: Consequence of Obama Care on patients over 70

On Nov. 22, 2011, Mark Levin the host of a Chicago's WLS radio talk show received a phone call from a neurosurgeon. According to the neurosurgeon, under Obama's health care plan, patients are called "units" and all patients over 70 years of age who need advanced neurosurgery will be given "comfort care" instead! Comfort care: "Medical care that is focused on relieving symptoms and optimizing patient comfort. Comfort care does not seek to cure or aggressively treat illness or disease." (Definition from <http://dying.about.com/od/glossary/g/Comfort-Care.htm>) In other words, patients over 70 needing advanced brain surgery to save their lives will be denied the surgeon's care!

## Linux: How to make audio CDs from YouTube videos

This morning I was asked if I could extract the audio tracks of certain Youtube videos and make a compilation of them on an audio CD in order to listen to them using a CD player. "I don't know how or if it's even possible," I replied. "Come on!" she said, "I know you can figure it out if you tried." And so I was faced with another technical challenge. But thanks to the ease of looking up information from the Internet, in only minutes I learned I have all the tools I needed on my Fedora 17 Linux PC.

You might wonder, "Why would anybody want to do *that*?" In her case, it was to be able to listen to some guy's seminar without using a PC. He was just

standing there talking. What he had to say was much more important than watching him say it.

First we must download the Youtube. I use a Mozilla Firefox add on called "Flash Video Downloader Youtube Downloader". It gives me a choice of what format to download with. In this case I downloaded in .flv format. The file downloaded to Downloads of my home directory.

First open Terminal and enter the following commands based on the name of the files you downloaded:

- `$ ffmpeg` (This is to make sure you have ffmpeg on your system: If you get a command not found message, install ffmpeg)
- `$ cd Downloads`
- `$ ffmpeg -i nameoffile.flv -vn -acodec copy yourfile.m4a`
- `$ ffmpeg -i nameoffile.m4a yourfile.wav`

Now the file is in wav format, perfect to make audio CDs out of. Just use your favorite CD Burner application to make an audio CD out of it. I use K3b.

If you are a Windows or a Mac user, I'm sure you can get the tools you need for this job, but it they may not be freeware.

## The six meanings of "Evolution"

Dr. Kent Hovind is one of my heroes. He is now suffering what the Apostle Paul suffered for boldly proclaiming the Truth of the Creator and the message of Jesus Christ: **Persecution resulting in imprisonment.**

Dr. Hovind urges creationists to define the word evolution before entering into a debate about Evolution verses Creation. He teaches us the 6 meanings of evolution:

1. Cosmic evolution: the origin of time/space/matter from nothing in the supposed "Big Bang"
2. Chemical evolution: all the elements "evolved" from hydrogen

3. Stellar evolution: stars formed from dust clouds
4. Organic evolution: life formed from non-living matter
5. Macro-evolution: plants and animals produce offspring different than their 'kind'
6. Micro-evolution: variations develop within the kind such as big dogs and little dogs; bacteria becoming resistant to drugs; etc.

Only ONE of these definitions for evolution is true SCIENCE—Number 6. The first five are part of a RELIGION that adherents must “believe” in since they have NEVER been observed or demonstrated.

## Percentage of Obese People per Country

The charts show the percentage of obese people per population among 34 nations of the world.

I found this data and the Japanese chart from <http://www2.ttcn.ne.jp/honkawa/2220.html>

Japan is the lowest with only 3.5% of the population and America is the highest with a whopping 35.9%! S. Korea is only 4.1% whereas Mexico is 30%. North Americans definitely eat too much sugar!
