

# Sharing Christ with a Convicted Criminal on Death Row

Patrick and Norah Pakai

The testimony in this article is from my Facebook friend, Patrick Pakai, a pastor in Zimbabwe, one of the poorest nations in Africa since the evil Robert Mugabe took the farms away from the white farmers and destroyed the economy through greed and corruption. I was so impressed with how Patrick talked to this prisoner I had to share it!

Today I was asked to speak the word of God to a prisoner on death row, condemned to be hanged any day for many crimes he committed against humanity. This huge guy was seated there motionless, with red threatening eyes, like he wanted to break my bones with his huge bare hands. I greeted him and he did not answer or move. I introduced myself as a Pastor and that I had brought the good news of our Lord Jesus Christ to him. He looked at me straight in my eyes and said, "Pastor, you are so late with your Jesus, it's too late now, I am facing death and your Jesus can not save me from death. Even you can not help me in any way, so pastor, get out of this place right now because I don't want to see you."

I said a quick prayer and I felt the presence of the Holy Spirit giving me strength and words of wisdom. I said to him, "My brother, I understand you and I will be out here soon, but you are telling me that you are sentenced to death, now tell me my brother, who in the world is not going to die? We all carry the sentence of death upon us, the only difference is the time and how we will die. As I am talking to you right now this minute, a thousand people have died in the whole world. And before they hang you, thousands will be dead in the world, and the judge who has judged you will die one day and the hang man will also die. So you see my brother, we all carry the sentence of death upon us, but what matters is we do not have to die without Jesus Christ in our lives because hell is certain for those who die without Christ. And

today I am not late to you, you are blessed that I have come to present Jesus Christ to you while you are still alive. I am so sad that I am late to many others who have already died without Christ for they will spend eternity in hell. So my brother, Jesus loves you and He wants to be with you forever in paradise".

As I was speaking to him, I saw tears coming down from his eyes, I did not invite him to kneel down, but he was there on the floor on his knees and pleading with me to lead him to Christ. Oh what an amazing time as I hold his huge hands and began to pray for him. One soul added to the Kingdom, praise the Lord.

(End of testimonial)

## **Messenger RNA Vaccines May Cause Damage to the Cardiovascular System**

### **Transcript of Dr. Bridle interview on *On Point* with Alex Pierson**

Alex Pierson: Talking about a lot of science these days! It's coming out as fast and furious. And a lot of people asking a lot of good questions, you know, the vaccines, are they safe for kids? Certainly, there's a big push to get kids as young as 12 the shot as soon as possible, but, but everyone's confident about it, even if you're not an anti-vaxxer, there are a lot of parents who are kind of nervous about putting something into their kids.

And then I read that there have been several dozen cases of heart problems in teens and young adults, which Israel is now looking into. And what they're looking into which they'll release the results of are why mostly males, not all, but around 22 years of age and younger, are getting heart inflammation. So one to four days after getting a shot, they get shortness of breath, fatigue, and some very specific chest pain. It's mild, so no one's gotten

really sick or died. But you want to know what you don't know if you're going to put something into your kids.

Let us bring in Dr. Byram Bridle. He's an associate professor of viral immunology at the University of Guelph (Ontario, Canada). Doctor, you've been very, you know, very open on this whole issue. And you know, you're not an anti-vaxxer by any stretch, but what do you think about this inflammation in the heart, and is it an actual threat?

Dr. Bridle: Yeah, thanks for having me on, Alex. Yeah, as you said, I'm very much pro-vaccine, but always making sure that the science is done properly, and that we follow the science carefully before going into public rollout of vaccines. I hope you'll let me run with this a little bit, Alex. I'll forewarn you and your listeners that the story I'm about to tell is a bit of a scary one. This is cutting-edge science.

There's a couple of key pieces of scientific information that I have become privy to just within the past few days that has made the final link. So we understand now, myself and some key international collaborators, we understand exactly why these problems are happening. And many others associate these vaccines. And the story is a bit of a scary one. So just to brace you for this, but I'm going to walk you through this. The science that I'm gonna be talking about. I don't have the time here to describe exactly the scientific data. But let me assure you that everything that I'm stating here that I'm gonna state right now is completely backed up by peer-reviewed scientific publications, and well-known and well-respected scientific journals.

I have all of this information in hand, I'm in the process of mildly trying to put it all into a document that I can hopefully circulate widely. So your listeners are going to be the first to hear the public release of this conclusion, and I can vouch for the science. So this is what it is.

The SARS-coronavirus 2 has a spike protein on its surface. That spike protein is what it allows it to infect our bodies. That is why we have been using the spike protein in our vaccines. The vaccines we're using get our cells in our bodies to manufacture that protein. If we can mount an immune response against that protein, in theory, we can prevent this virus from infecting the body. That's the theory behind the vaccine. However, when studying the disease, severe COVID-19, everything that you've just described heart problems, lots of problems with the cardiovascular system, bleeding and clotting is all associated with severe COVID-19.

And looking and doing that research, what has been discovered by the scientific community is the spike protein on its own is almost entirely responsible for the damage to the cardiovascular system if it gets into circulation. Indeed, if you inject the purified spike protein into the blood of research animals, they get all kinds of damage to the cardiovascular system, and it can cross the blood-brain barrier and cause damage to the brain.

Now at first glance, that doesn't seem too concerning because we're injecting

these vaccines into the shoulder muscle. The assumption all up until now has been that these vaccines behave like all of our traditional vaccines that they don't go anywhere other than the injection site, so they stay in our shoulder. Some of the protein will go to the local draining lymph node in order to activate the immune system. However, this is where the cutting edge science has come in this and this is where it gets scary.

Through a request for information from the Japanese regulatory agency, myself and several international collaborators have been able to get access to what's called a bio-distribution study. It's the first time ever that scientists have been privy to seeing where these messenger RNA vaccines go after vaccination. In other words, is it a safe assumption that it stays in the shoulder muscle?

The short answer is absolutely not. It's very disconcerting.

The spike protein gets into the blood, circulates through the blood in individuals, over several days post-vaccination. It accumulates once it gets to the blood and accumulates in a number of tissues such as the spleen, the bone marrow, the liver, the adrenal glands. One particular concern for me is it accumulates at quite high concentrations in the ovaries. And, and then also a publication that was just accepted for a scientific paper just accepted for publication that backs this up, looked at 13 young healthcare workers that had received the Moderna vaccine which is the other messenger-RNA-based vaccine we have in Canada. And they confirm this They found the spike protein in circulation in the blood of 11 of those 13 health care workers that had received the vaccine.

What this means is, so we have known for a long time that the spike protein is a pathogenic protein, it is a toxin, it can cause damage in our body if it gets into circulation. Now, we have clear cut evidence that the vaccines that make our bodies, our muscles or the cells in our in our deltoid muscles, manufacture this protein, that the vaccine itself, plus the protein gets into blood circulation. When in circulation, the spike protein can bind to the receptors that are on our platelets and the cells that line our blood vessels.

When that happens, it can do one of two things. It can either cause platelets to clump, and that can lead to clotting. That's exactly why we've been seeing clotting disorders associated with these vaccines, it can also lead to bleeding. And of course, the heart involved. It's part of a key part of the cardiovascular system. That's why we're seeing heart problems.

The protein can also cross the blood-brain barrier and cause neurological damage. That's why also in the fatal cases of blood clots many times is seen in the brain. And also of concern is there's also evidence of a study – this has not yet been accepted for publication yet, this one – they were trying to show that the antibodies from the vaccine get transferred through breast milk. And the idea was this may be a good thing because it would prefer some passive protection to babies. However, what they found inadvertently was that the vaccines, the messenger RNA vaccines, actually get transferred through the breast milk. So the delivering the vaccine vector itself into infants

that are breastfeeding. Also what this note we know spike protein gets into circulation, any proteins in the blood will get concentrated in breast milk. Looking into the adverse event database in the United States, we have found evidence of suckling infants experiencing bleeding disorders in the gastrointestinal tract.

Alex Pierson: So okay, let me pause you there. There are only about 45 seconds left.

Dr. Bridle: Sure, I'll wrap it up this message.

So this has implications for blood donation. Right now Canadian Blood Services are saying that people who have been vaccinated can donate. We don't want the transfer of these pathogenic spike proteins to fragile patients who were being transfused with that blood. This has implications for infants that are suckling. And this has serious implications for people for whom SARS Coronavirus 2 is not a high-risk pathogen, and that includes all of our children.

In short, the conclusion is, we made a big mistake, we didn't realize it until now, we thought the spike protein was a great target antigen, we never knew the spike protein itself was a toxin and was a pathogenic protein. So by vaccinating people, we are inadvertently inoculating them with a toxin. And some people this gets into circulation. And when that happens in some people, they can cause damage, especially in the cardiovascular system. And I have many other, I don't have time, but many other legitimate questions about the long term safety, therefore, of this vaccine, for example, with it accumulating in the ovaries, one of my questions is, will we be rendering young people infertile, some of them infertile? So I'll stop there. I know it's heavy heading...

Alex Pierson: I'm up against the clock. I need like an hour when I talk to you because you have so much information and of course your one opinion of many, but you know, it's interesting because you have a different look at it. And certainly, the time will tell on this but we'll have you on again because I always get an interesting and different perspective from you. Doctor, thank you.

Dr. Bridle: It was my pleasure. Take care.

---

**In Thee Shall All Families of the Earth Be Blessed**

As you see from the meme, the title of this post is taken from Genesis 12:3. Here it is in context:

*Genesis 12:1 ¶Now the LORD had said unto Abram, Get thee out of thy country, and from thy kindred, and from thy father's house, unto a land that I will shew thee:*

*2 And I will make of thee a great nation, and I will bless thee, and make thy name great; and thou shalt be a blessing:*

*3 And I will bless them that bless thee, and curse him that curseth thee: and in thee shall all families of the earth be blessed.*

To whom was that promise made?

John Hagee, a prominent Christian Zionist pastor says of Genesis 12:2-3:

No pronouncement of scripture is clearer or more decisive. God smiles on the friends of the descendants of Abraham, and they enjoy heavenly favor. In contrast, God will answer every act of anti-Semitism with harsh and final judgment  
Final Dawn Over Jerusalem, page 20

Pastor Hagee is applying those Scriptures to the Jews and the modern nation of Israel. But does the Word of God itself apply it that way? Absolutely *not*! That promise does not apply to the Jews / Israelis today! How do I know that? The Apostle Paul in Galatians chapter 3 clearly says the promise of God of Genesis 12:2,3 was made to Abraham and his Seed! That Seed is Christ and those in Christ, those who hold Jesus of Nazareth to be Christ!

Genesis 28:14 adds additional insites.

*Genesis 28:14 And thy seed shall be as the dust of the earth, and thou shalt spread abroad to the west, and to the east, and to the north, and to the south: and in thee and **in thy seed** (singular) shall all the families of the earth be blessed.*

And the Apostle Paul in Galatians chapter 3 makes it abundantly clear to whom these promises are referring to.

*Galatians 3:16 Now to Abraham and his seed were the promises made. He saith not, And to seeds, as of many (plural); but as of one (singular), And to **thy***

**seed, which is Christ.**

The King James Version of the Bible uses the archaic form of you, the word "thee" and its possessive form "thy" which is singular. And it also uses the word "you" which, when you see it in the KJV, you should know it's always plural. And it uses grammatical forms of you we don't have today such as "ye" which is plural. A great example of this is John 3:7.

*John 3:7 Marvel not that I said unto **thee**, **Ye** must be born again.*

The "thee" of John 3:7 was the person who Jesus was talking to, Nicodemus, and the "ye" is everybody else, us, the people of the world.

The NIV translation is John 3:7 is

*You should not be surprised at my saying, 'You must be born again.'*

The NIV is not as clear as the KJV when it uses the word "you" in John 3:7. The KJV is true to the original Greek which uses both the singular and plural form of the Greek word for you in John 3:7.

Why I am talking about English grammar in this Bible study? Because the key to understanding Genesis 12:3 and Genesis 28:14 is to know the words "thee" and "thy" are referring to Abraham and his seed singular, not plural.

*Genesis 12:3 And I will bless them that bless **thee**, and curse him that curseth **thee**: and in **thee** shall all families of the earth be blessed.*

God today blesses those who bless Abraham's seed.

*Genesis 28:14 And **thy seed** shall be as the dust of the earth, and thou shalt spread abroad to the **west, and to the east, and to the north, and to the south**: ...d*

Genesis 28:14 clearly is applicable to the Gentiles who have received Christ as their Lord.

*Galatians 3:29 And **if ye be Christ's, then are ye Abraham's seed, and heirs according to the promise.***

Combining Genesis 12:3 with what the Apostle Paul teaches in the Book of Galatians, we can clearly see God's promise to Abraham refers to people who bless Christ and Christians, those who acknowledge that Jesus of Nazareth is the Christ, the Messiah! And all the families of the earth who have received Jesus of Nazareth as the Christ, the Messiah, have been blessed. It's not at all talking about blessing the Jews or the modern nation of Israel. In fact, the Bible doesn't even call them Jews!

*Romans 2:28 For he is **not a Jew, which is one outwardly**; neither is that circumcision, which is outward in the flesh:*

*29 But he is a Jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter; whose praise is not of men, but of God.*

In other words, only those in Christ are Jews in God's eyes!

Should we bless the Jews who do not believe in Jesus of Nazareth as their Messiah? We should rather pray for them! Pray that their eyes be opened to the light of the Gospel of Christ!

Just the other day I had a wonderful conversation with a lady who calls herself Jewish. She was born in Israel and raised in Guam. She went to both a synagogue and a Christian school. I shared the Gospel with her and she listened.

I hope you see why it is important to read from a Bible translation such as the KJV that makes a difference between the singular and the plural. Most languages of Europe still use different words to denote a singular and a plural you. I know Russian does, and therefore probably all the Slavic languages, and I know Spanish does, and therefore probably all the Romance languages do. I don't know about the Germanic languages because I haven't studied them as I have Spanish and Russian. I heard that English dropped the singular words, "thee", "thou", "thy" and "thine" because they can be used in a condescending way. This is true of other European languages as well, but the singular form of the word you still remains part of their modern-day language.

---

## Who Are The True Citizens of Israel? Those in Christ Jesus!

The saints are those people who are sanctified in Christ Jesus be they Jews or Gentiles!
