

America was Mortally Wounded in 1913 by the Federal Reserve Act

Woodrow Wilson, the US President who signed the Federal Reserve Act, later regretted that decision and said,

"I am a most unhappy man. I have unwittingly ruined my country. A great industrial nation is controlled by its system of credit. Our system of credit is concentrated. The growth of the nation, therefore, and all our activities are in the hands of a few men. We have come to be one of the worst ruled, one of the most completely controlled and dominated governments in the civilized world. No longer a government by free opinion, no longer a government by conviction and the vote of the majority, but a government by the opinion and duress of a small group of dominant men."

In the video below, Glen Beck introduces G.Edward Griffin's book, "The Creature from Jekyll Island" which is the true history of the privately owned Federal Reserve Bank. By the way, The FED is not federal and there is no reserve. It prints up money with only the cost of paper, ink, and labor, and lends it to the government with interest! If you or I did that we would be arrested for fraud!

The FED is nothing more than a cartel like OPEC but it's a money cartel.
