

# CDC Says Only 6% of Covid Patients Died from CV19 Alone

That means 94% of so-called Covid 19 deaths is a mainstream media lie!

I got the following text from a video on Twitter. It's very similar in content to the Bitchute video.

The Centers for Disease Control have updated their death counts for Coronavirus and reveal yet again that **COVID-19 is rarely the actual cause of death** among Coronavirus patients.

According to the CDC themselves, of the 220 thousand deaths attributed to the Coronavirus, 87,000 of them died from pneumonia and influenza. Another 17,000 died from chronic respiratory diseases, and 26,000 died from respiratory distress syndrome, 44,000 patients died from hypertensive diseases, 23,000 died from heart disease, and a whopping 28,000 died from cardiac arrest and heart failure. Yet all of these, even patients who died from heart attacks, were marked down as dying from the Coronavirus. Doctors who spoke with one American News explained that 131,000 patients who are being considered COVID-19 deaths already had life-ending diseases, including cancer, dementia, and even end-stage renal failure. And, according to the CDC again, if you look at the place of death, you'll see that some 10,000 patients who died from Covid were on hospice care, meaning they were terminally ill to begin with and we're already expected to die.

Doctors tell one American news that all of these patients were critically ill and likely died from their pre-existing conditions without any help from the Coronavirus. However, they explained that the Cares Act passed by Congress in March gives hospitals a 20% bonus on their Diagnosis Related Group paid for by Medicare. Essentially that means doctors are being paid to list deaths as Coronavirus without any indication the patient's death was actually Covid related.

The CDC backs these numbers up by explaining that Coronavirus itself is responsible for just 6 percent of all deaths listed as Coronavirus related. The other 94% of deaths are due to pre-existing comorbidities, including serious illnesses and advanced age. However, despite this report being

officially published by the CDC, so far the mainstream media have completely ignored it and instead continue to hype a pandemic that seems less dangerous every day.
