Chapter 3. Wuhan-Catholic Connection

The Coronavirus by Bill Hughes. Chapter 3.
Wuhan-Catholic Connection

This is continued from [Chapter 2. Conspiracy](#)

What has been the story from day one in this coronavirus conundrum? The story has been thus, In the public mind, the origin story of coronavirus seems well fixed: in late 2019 someone at the now world-famous Huanan seafood market in Wuhan was infected with a virus from an animal. The rest is part of an awful history still in the making, with Covid-19 spreading from that first cluster in the capital of China's Hubei province to a pandemic that has killed about 350,000 people so far (to the time this article was written).

December 31-January 11, 2020

On December 31 last year, China alerted the WHO to several cases of unusual pneumonia in Wuhan, a city of 11 million people. The virus was unknown. Several of those infected worked at the city's Huanan Seafood Wholesale Market, which was shut down on January 1. As health experts worked to identify the virus amid growing alarm, the number of infections exceeded 40.

On January 5, Chinese officials ruled out the possibility that this was a recurrence of the severe acute respiratory syndrome (SARS) virus – an illness that originated in China and killed more than 770 people worldwide in 2002-2003.

On January 7, officials announced they had identified a new virus, according to the WHO. The novel virus was named 2019-nCoV and was identified as belonging to the coronavirus family, which includes SARS and the common cold.

On January 11, China announced its first death from the virus, a 61-year-old man who had purchased goods from the seafood market. Treatment did not improve his symptoms after he was admitted to hospital and he died of heart failure on the evening of January 9.

January 13 – 19, 2020

The WHO reported on January 13 a case in Thailand, the first outside of

China, in a woman who had arrived from Wuhan.

On January 17, as a second death was reported in Wuhan, health authorities in the US announced that three airports would start screening passengers arriving from the city. Authorities in the US, Nepal, France, Australia, Malaysia, Singapore, South Korea, Vietnam and Taiwan confirmed cases over the following days.

January 20 – 26, 2020

On January 20, China reported a third death and more than 200 infections, with cases also reported outside Hubei province including in Beijing, Shanghai and Shenzhen. Meanwhile, a Chinese expert on infectious diseases confirmed human-to-human transmission to state broadcaster CCTV, raising fears of a major outbreak as millions travelled for the Lunar New Year holiday. The cities of Wuhan, Xiantao and Chibi in Hubei province were placed under effective quarantine on January 23 as air and rail departures were suspended. By the end of the week, more areas were placed under lockdown affecting a total of 56 million people. The WHO said that the outbreak did not yet constitute a public emergency of international concern and there was “no evidence” of the virus spreading between humans outside of China.

January 27 – February 2, 2020

On January 30, the WHO declared the coronavirus a global emergency as the death toll in China jumped to 170, with 7,711 cases reported in the country, where the virus had spread to all 31 provinces. By the end of the week, China reported 304 deaths amid 14,380 infections. Within a few days, new cases were confirmed in India, Philippines, Russia, Spain, Sweden and the United Kingdom, Australia, Canada, Germany, Japan, Singapore, the US, the UAE and Vietnam.

On February 2, the Philippines reported the first death outside China, the victim being a Chinese man from Wuhan, the capital of Hubei province where the new coronavirus was detected in late 2019.

March 23 – 29, 2020

In the US, the White House and Senate leaders of both parties struck an agreement on March 25 on a sweeping \$2 trillion measure to aid workers, businesses and a healthcare system strained by pandemic. By the end of the week, the US accounted for the highest number of coronavirus infections in the world, recording more than 124,000 cases and 2,000 deaths, more than double the figure two days before. Meanwhile, as the number of cases worldwide surpassed 600,000, with more than 27,000 deaths on March 27, India and South Africa joined the countries to impose lockdowns. Kenya, Kazakhstan and Honduras reported their first deaths, while Johnson announced he had tested positive. In Europe, Spain recorded 838 new coronavirus deaths over the previous 24 hours on March 29, marking the country's highest daily jump in fatalities. The country was now second only to Italy where the death toll shot past 10,000 with 889 new deaths. (taken from Aljazeera, May 18, 2020)

The previous paragraphs make it very clear that the virus had its origins in Wuhan, China back in December. From this epicenter, the virus has now spread all over the world, killing hundreds of thousands of people and disrupting the lives of everyone on this planet. And you say, this has everything to do with Wuhan, China and NOTHING to do with the Vatican! That is very perceptive of you. Here goes.....

“Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, warned members of the incoming Trump administration in January 2017 about the inevitability of a “surprise outbreak” of a new disease. He said at the time that the US needed to do more to prepare. **“There is no question that there will be a challenge to the coming administration in the arena of infectious diseases,”** Fauci said during a speech at Georgetown University, adding, “The thing we’re extraordinarily confident about is that we’re going to see this in the next few years.” Business Insider, April 13, 2020

How did Fauci know this? How did he know there would be a pandemic during the Trump administration? Isn’t Fauci a doctor? He sounds more like a prophet. , “The thing we’re extraordinarily confident about is that we’re going to see this in the next few years.” Business Insider, April 13, 2020

The following two statements shed on light on how Fauci could be so sure that a pandemic would strike during the Trump administration. **“Dr. Anthony Fauci, a member of the coronavirus task force, had previously backed funding for a controversial lab in Wuhan, China, that has been studying the coronavirus in bats, reports said. Fauci’s National Institute of Allergy and Infectious Diseases had shelled out a total of \$7.4 million to the Wuhan Institute of Virology lab – which has become the focus of theories about the origin of COVID-19, according to Newsweek.** The National Institutes of Health, which oversees the NIAID, shut down all funding to the lab last week. “At this time, NIH does not believe that the current project outcomes align with the program goals and agency priorities,” a deputy director at the agency wrote in a letter obtained by Politico. There is “increasing confidence” among officials in the Trump administration that the Wuhan Institute of Virology lab is the original site of the virus. A report by Fox News said embassy officials warned in January 2018 about inadequate safety there. **The NIH defended its funding of the lab in a statement to Newsweek.”** April 29, 2020, New York Post.

Fauci’s organization, the National Institute of Allergy and Infectious Diseases, sent 7.4 million dollars to the Wuhan laboratory in China, knowing full well that they were studying the coronavirus in bats. If his organization sent 7.4 million dollars to the Wuhan lab, then obviously Fauci was backing the research to the hilt. He not only knew of the experimenting, but backed it with millions of dollars. Fauci also believes in the golden rule. The one who dishes out the dough makes the rules! If Fauci was doling out 7.4 million, would it be safe to say that, he being a medical expert in infectious disease, was also part of what went on at Wuhan? The writing on the wall says yes!! This information is shocking, tying Anthony Fauci to Wuhan and the coronavirus.

The final comment from Newsweek magazine goes even further. "Dr. Anthony Fauci is an adviser to President Donald Trump and something of an American folk hero for his steady, calm leadership during the pandemic crisis. At least one poll shows that Americans trust Fauci more than Trump on the coronavirus pandemic—and few scientists are portrayed on TV by Brad Pitt. ***But just last year, the National Institute for Allergy and Infectious Diseases, the organization led by Dr. Fauci, funded scientists at the Wuhan Institute of Virology and other institutions for work on gain-of-function research on bat coronaviruses.*** In 2019, with the backing of NIAID, the National Institutes of Health committed \$3.7 million over six years for research that included some gain-of-function work. The program followed another \$3.7 million, 5-year project for collecting and studying bat coronaviruses, which ended in 2019, bringing the total to \$7.4 million. ***Many scientists have criticized gain of function research, which involves manipulating viruses in the lab to explore their potential for infecting humans, because it creates a risk of starting a pandemic from accidental release.***

SARS-CoV-2, the virus now causing a global pandemic, is believed to have originated in bats. ***U.S. intelligence, after originally asserting that the coronavirus had occurred naturally, conceded last month that the pandemic may have originated in a leak from the Wuhan lab.*** (At this point most scientists say it's possible—but not likely—that the pandemic virus was engineered or manipulated.) Dr. Fauci did not respond to Newsweek's requests for comment. NIH responded with a statement that said in part: "Most emerging human viruses come from wildlife, and these represent a significant threat to public health and biosecurity in the US and globally, as demonstrated by the SARS epidemic of 2002-03, and the current COVID-19 pandemic.... scientific research indicates that there is no evidence that suggests the virus was created in a laboratory. ***The NIH research consisted of two parts. The first part began in 2014 and involved surveillance of bat coronaviruses, and had a budget of \$3.7 million. The program funded Shi Zheng-Li, a virologist at the Wuhan lab, and other researchers to investigate and catalogue bat coronaviruses in the wild. This part of the project was completed in 2019.***" Newsweek, April 28, 2020

Researching viruses in laboratories is highly criticized by scientists because of the possibility of the virus being leaked and causing a pandemic. This is exactly what happened in Wuhan. Dr. Fauci's comments in 2017 would indicate that he knew that would be the case and warned it was coming!!! Was that part of his pre meditated plan to perfect a virus, pay for its research and perfection, and then have it leaked so that millions of people would die? Was Fauci already clear in his mind that once the virus was perfected in Wuhan that he would then have it released in order to infect millions? Was that why Fauci could speak with such arrogance in 2017 that a pandemic would hit the Trump administration? The three news sources that exposed this material are the Business Insider, the New York Post, and Newsweek! This material is shocking!

Why would Fauci pull such a stunt? What could possibly be his purpose or the purpose of those who control him? A little background on this reprehensible man provides the hidden clues. "His maternal grandfather, Giovanni Abys, was

born in Switzerland and was an artist, noted for landscape and portrait painting, magazine illustrations (Italy) as well as graphic design for commercial labels, including olive oil cans. His grandparents emigrated from Italy to the United States in the late 19th century. **Fauci grew up Catholic.** Fauci attended Regis High School in Manhattan's Upper East Side, where he captained the school's basketball team and graduated in 1958. **He then went to the College of the Holy Cross, graduating in 1962 with a Bachelor of Arts in classics. Fauci then attended medical school at Cornell University Medical College where he graduated first in his class with a Doctor of Medicine in 1966.** He then completed an internship and residency in internal medicine at the New York Hospital-Cornell Medical Center, now known as New York Presbyterian/Weill Cornell Medicine." So, Fauci is a devout Roman Catholic and attended the College of the Holy Cross. And what do we know about Holy Cross? Wikipedia says, **"The College of the Holy Cross, or better known simply as Holy Cross, is a private Jesuit liberal arts college in Worcester, Massachusetts. Founded in 1843, Holy Cross is the oldest Catholic college in New England and one of the oldest in the United States.** Opened as a school for boys under the auspices of the Society of Jesus, it was the first Jesuit College in New England. Today, Holy Cross is one of 28 member institutions of the Association of Jesuit Colleges and Universities." Wikipedia

Fauci used his profession to carry forward the global, papal/Jesuit agenda for the world. In a forthcoming chapter, we will see clearly what that agenda is. Fauci is not a calm, sensible man, but rather a cool, calculating medical madman in the Beltway!!
