

James Japan Website SSL Issues – Fixed!

James Japan Website SSL Issues - Fixed!

Update:

It's now March 12, 2:30 pm in Guam and the SSL issue has been resolved! An hour ago I went back to the control panel and was allowed to enable the free SSL certificate option. ☐

It's March 11, 8:20 AM Guam time, and I am still having problems with SSL since March 8th. The hosting company of this website, Ipage, changed their policy for providing me a free SSL certificate. I had been using a third-party domain name server (Cloudflare) and not the Ipage server, the free SSL certificate was taken away! This has resulted in security warnings when accessing this website. About 30 hours ago I changed the DNS to point back to Ipage, but the change has not been completed yet. I was told it could take up to 72 hours.

Please be assured you are not in any security danger when visiting this site because I am not asking you to submit any sensitive information such as your credit card number. Thank you to those who have recently sent me gifts through PayPal. Your bank information has not been compromised because you are sending via PayPal and not directly through this website.
