

Japan's Most Senior Oncologist, Prof. Fukushima Condemns mRNA Vaccines as 'Evil Practices of Science'

Solid science from a noted Japanese doctor and scientist that COVID-19 vaccines have injured people to the point of causing their deaths.

Why Europe in the Middle Ages Was So Filthy

Europe in the Middle ages was filthy because the Catholic Church forbid the people to read the Bible. They didn't know the importance God puts on cleanliness.

Japanese Doctors Warn About the Side Effects of the COVID-19 Vaccines

This is a transcript of a press conference called by Japanese physicians. Throughout the decades when I lived in Japan, it's been my observation that most Japanese are honest people and are not easily deceived by the media. When they encounter difficulties, they'll do an honest investigation of the problem and won't be easily swayed by others.

Transcript

We are the General Incorporated Association of the Vaccine Injuries Study Group. We now have this press conference to report on the results of our study since its establishment. My name is Takeguchi, and I will be moderating the conference.

First of all, I would like to take this opportunity to express my condolences to those who have passed away due to health issues after receiving the COVID-19 vaccine. Furthermore, I extend my best wishes to those who have suffered health issues and those who are currently struggling with symptoms.

(Next speaker)

A systematic review of the literature has revealed some surprising facts. Thousands of papers have reported side effects after vaccination, which affect every organ without exception, ranging from ophthalmology (the diagnosis and treatment of eye disorders) to general medicine, to psychiatry. We have compiled this information into a paper that was published yesterday.

These documents have been preliminarily investigated by a group of volunteer physicians. They saw how many cases have been reported by Japanese academic societies. This kind of reporting on drug side effects or the like is unprecedented.

As my specialty is cancer, chemotherapy drugs are plagued with side effects, but the patterns are known and predetermined. The patterns of side effects caused by this (COVID-19) vaccine are not determined. They can occur throughout the body. Multiple diseases can occur simultaneously. Doctors have never seen such a thing. This is the candid opinion of the medical profession.

Japanese doctors are also trying hard, but they face various obstructions. There's this sentiment of 'Why report something like vaccine damage?' There are interferences in reporting. Such actions themselves hinder academic freedom, and in some academic departments, censorship is taking place such as in conference presentations and publications of academic papers. This is

happening globally. Some journals are effectively practicing censorship.

We are working on a paper that is expected to be published soon. Once published, we will be able to report in detail. For example, the age-adjusted mortality rate for leukemia has increased, and there are significant findings of breast cancer, ovarian cancer, and so on. We will share the relevant information with everyone as we advise and request the government on how to proceed.

Next, Prof. Yasufumi Murakami, the director in charge of the testing method development working group, will explain the progress of the test development and future outlook.

Prof. Yasufumi Murakami: Thank you, everyone. One thing I want to say initially is that it is clear how the adverse effects occur, which is still having many victims today. **I believe the vaccine should be stopped immediately.**

The mechanism by which adverse effects occur is well understood; **the spike [protein] is toxic.** It's very clear what happens when you administer a toxic gene to a human. Another point is that the Lipid nanoparticles, they are also toxic.

The major problem is that we are injecting two toxic substances into people, one of which is that human cells are producing spike proteins. Since the immune system will attack this, it causes very violent reactions. Some cases occur within one or two weeks after injection, but there are also many cases that appear after one or two years.

Additionally, there is indeed such a thing as good and bad antibodies in humans, and an antibody called IgG4 actually suppresses immunity. Usually with vaccines, if an IgG4 antibody is induced, it is considered a failure. However, with the current messenger-type vaccines, a significant amount of IgG4 is being induced. When this happens, it plays tricks on various immune functions. Therefore, we want to thoroughly investigate what ratio of Japanese people are experiencing this. We aim to carefully examine what level of IgG4 reacts with the spike protein that is present in each individual.

Of course, the problem is, we already understand these factors. Vaccines that have failed are still being administered, and the Ministry of Health, Labour and Welfare recognizes these failed vaccines. So I would like to stop them immediately, but even though I speak out against the vaccine in various places, they don't stop administering them at all. So we will clearly present evidence and publish it in articles one by one.

New speaker: So, we are working with Dr. Fukushima to create this database, and so far, about 201 types of diseases and 3,071 papers on side effects have been reported. **It is unprecedented in human history for a single vaccine to have this much literature out on it.** With this, we plan to present it to the nation and the Japanese government in the form of solid science that no one can dispute.

In the next slide you will find diseases of the heart, kidney, thyroid, diabetes, liver, skin, eyes, blood, nerves, systemic diseases, brain, and lungs, diseases across all medical fields have been reported as Prof. Fukushima states. The characteristic of the side effects of this vaccine is that they occur simultaneously within entire families.

As for the data, when diseases such as those of the heart, kidney, endocrine, and liver occur simultaneously with the range in which they occur, a tremendous number of papers are reported with many pages.

New speaker: Mental disorders, psychiatric symptoms, depression, mania, and anxiety, came up in abundance. It's endless. It's about understanding why this is happening. That's why, actually, with broader keywords, for example, not just COVID-19 vaccines but also SARS-CoV-2, messenger RNA vaccines, and the like, when you separate it out into various keywords, more and more results come up. So this is just a part of it. Even with what Dr. Inoue introduced earlier, it's just a part of what has been done with the PubMed database. There are things that won't be caught by PubMed. So like "Creutzfeldt-Jakob disease (CJD)", it's not caught, next slide.

However, there are such peer-reviewed papers out there from Dr. Montagnier who discovered HIV and received the Nobel Prize. It's a persuasive paper. But it disappeared. He was cautious from the beginning.

About the spike protein sequence, within the genes, you know, he was warning that if there's a prion-like (pathogenic type of misfolded protein) sequence, it could be very dangerous. Many scientists were warning about it. I too said it could be hazardous because of the possibility of prions. I discussed it with prion experts.

So, if you inject the vaccine into the muscle, it will be taken up by the surrounding cells. People who know nothing about medicine and biology don't think about such specific things, which is why they say it's an mRNA vaccine. However, if you know biology and medicine, such specific things don't happen. That is what we call off-target. Out of control beyond the target. It doesn't know where to go. If it goes into the bloodstream, it goes to the brain, liver, and kidneys. What if it went everywhere? That's something people don't think about. This off-target problem hasn't been solved.

And even if that is solved, there are still many problems. Because these nanoparticles, which were inflammatory earlier, are environmental issues, especially plastic nanoparticles, which are the world's number one problem. They enter the brain. However, those who don't know anything say, "It's plastic, so it won't be digested, so it's okay to eat." They pretend to know, but it doesn't get digested. The person has no idea how toxic organic substances are attached to the surface of those plastic nanoparticles. So, with fragments of such knowledge, they exaggerate things and think they can go with this. They say, "I know! This is good!" So, honestly, they need to go back and redo from middle school biology to high school and university entrance exams.

As I mentioned earlier, medicine is still immature. Basically, we don't

understand much about the principles of life. Now, this kind of thing has happened, so, turning adversity into fortune, we should learn again here what happens instead of saying, "Go for it, go for it" with the vaccines. Well, it's like, ignorance is bliss. That's what this world is about. **Taking vaccines has become a kind of faith. Vaccines centers, they're like a weird cult. They're now basically fallen into an infinite hell.**

Simply thinking that things can be understood with fragments of knowledge is a mistake.

(End of transcript.)

The Pope – Chief of White Slavers, High Priest of Intrigue

Former Catholic priest Jeremiah J. Crowley exposes the Popes of Rome as evil tyrants whose interest is only money and power over as much of the world as possible

"Our government is out of control." –

Dr. Robert Malone

Dr. Robert Malone, co-inventor of the mRNA technology explains how ten's of thousands of physicians & scientists are being canceled simply for questioning the official Covid-19 narrative. The text of the video is below in case YouTube removes the video.

Our government is out of control. And they are lawless. They completely disregard bioethics. They completely disregard the federal common rule. They have broken all the rules that I know of, that I've been trained on for years and years and years. These mandates are explicitly inconsistent with the Nuremberg Code. They're explicitly inconsistent with [the Belmont Report](#). They are flat-out illegal and they don't care. When you see this kind of decoupling of public policy from logic, then it causes thinking people to say "what the hell's going on here?" And then we go down the rabbit hole is that this? that? or the other thing?

One of the things in that spectrum of what's going on is that the emergency use authorizations are predicated on policy determinations that we're in a state of emergency. Those are now two years old. They're expiring. I'm not saying this is what's going on in their head. But there is another perverse incentive here to amplify the fear porn. And to amplify, if you buy into the hypothesis, that for some reason, there are incentives for the government to maintain the state of emergency, that is one explanation, given that those declarations are expiring, and will have to be re-implemented. Because if they're not, then all of this emergency use authorization vanishes like dust.

It's hard for me to reconcile the behavior of the government and its public health decisions with the data. Is it incompetence? Or is there some ulterior political motive? Or are they just dumb, stupid?

We're in an environment in which truth and consequences are fungible. This is modern media management and warfare. The truth is what those that are managing the trusted news initiative, say it is. In my case, I'm the president of the International Alliance of physicians and scientists. We're over 16,000 people from all over the world, physicians, and scientists. And you can find our website at globalCOVIDsummit.org. We are gobsmacked about what's going on. And we are shut down, censored, demeaned – fill in the blank – all over the world. And they're taking our licenses because we are speaking

about these matters.

And you can label me however you want to label me. I don't care. I've done what I've done in my career. I'm at a stage at 62 years old. I've got a farm. It's almost paid off. I raise horses. I love my wife. You know, I've been married a long time. My kids are both married. I got grandkids, man. Oh, I don't need this. There's this claim. I'm doing all this because I seek attention. Trust me. This is not a fun thing to be doing at this stage.

Physicians at [FLCCC](#) (Front Line COVID-19 Critical Care Alliance) in senior positions, Peter McCullough, people at the culmination of exceptional careers, Paul Merrick, an exceptional physician by any standards, run out of his hospital, demeaned, destroyed, actively attacked, trying to take his license. People are losing faith in the whole system. They're losing faith in the scientific enterprise. They're losing faith in our government.

I like to say when I give rallies, do you remember back a couple of years ago, when you felt sorry for the people in the People's Republic of China because their internet was filtered? They weren't allowed free speech. Their government told him what to do and think. Now, here we are.

And the next thing that we all feel sorry about is the social credit system.

Wake up, folks.

[First Hitchhiking Adventure of 2016 from Niigata City](#)

On March 4th, 2016 I hitchhiked 100 kilometers or about 60 miles to the city of Tokamachi. It is a city in the midst of hills. The Shinano River which is the longest river in Japan flows through Tokamachi. It's called "Shinano" for that was the old name of Nagano Prefecture which is its source. But in Nagano Prefecture the same river is called Chikuma.

Doctor Masaya

The first driver was a medical doctor by the name of Masaya. He works in a hospital not far from my home. I asked Masaya if he believes the spirit is separate from the physical. He said most doctors do not believe the spirit affects physical health, but he does. I gave him tracts from [Dr. John Gideon Hartnett](#) that expose Evolution, Big Bang, Dark Matter and Dark Energy as pseudo-science. Masaya took me from Niigata city to Sanjo city which is on the Kanetsu / Hokuriku expressway. He could not take me exactly where I wanted to go in Sanjo because he was pressed for time. I walked the rest of the way, about 20 minutes and crossed a bridge over the Shinano River to get to the expressway interchange.

Man who took me to Echigo Kawaguchi

After hitchhiking at the expressway interchange for 15 minutes without success, I decided to take a 190 yen bus ride to get to the Sakae Parking area of the expressway. From there a man on the way to Gunma prefecture took me to Echigo Kawaguchi. "Echigo" is the old name for Niigata before the Meiji era. Kawaguchi literally means "river's mouth". It has some meaning related to the Shinano River which passes through it. The man was coming from Gosen City on his way back home in Gunma.

Because the man was not getting off the expressway, he dropped me off at a parking area from where I could walk over a bridge to get off the expressway to a regular road. Pedestrians are *not* supposed to be walking on that bridge! One of the expressway workers saw me passing by the toll booth and knew I must have walked over the bridge from the expressway parking area! By the time he saw me I was already in safe territory and there was nothing he could do to stop me from going further. He was only curious as to what I was doing. I was honest with him and told him I was hitchhiking and needed to go to Tokamachi. Because the driver didn't get off the expressway at that point, I had to walk. He told me that was a no no and not to do it again, but he wasn't upset at me at all. He said it only out of a sense of duty to the people he works for.

After that it was only a few minutes wait for the next man to stop. Tokamachi was still too far to walk to. It was a 30 minute drive from Echigo Kawaguchi. The weather was fine that day and the sunset was beautiful over scenic Tokamachi. This city is noted for its heavy snowfalls, but this year the snow wasn't as high as last year.

Tokamachi at dusk

My purpose to go to Tokamachi was to visit my good friends Keiji and Miyoko and family. The next day Keiji had business in Mitsuke city which is going back the way I came. But nevertheless because he would be passing by Ojiya City, I asked him to take me to the Ojiya Interchange. My destination was Sayama City in Saitama Prefecture. From Ojiya it is nearly twice the distance that I traveled the previous day. But I had all day to get there.

Ojiya City is close to the epicenter of a major earthquake in October 2004. About 50 people died. Had an earthquake the same strength occurred in the center of Tokyo, hundreds of thousands would have died! Roads after the earthquake were broken and cars could not pass from Niigata to Tokyo the shortest way possible.

After only a few minutes at the Ojiya Interchange, a man stopped and took me to Echigo Kawaguchi, the expressway service area I had been to the previous day. But this day I needed to go further. It was fine weather and so warm I actually took off my heavy winter coat!

It was about an hour before I finally got a good ride. Just before it a man offered to take me to Muika Machi, but it was too close and would have taken me back off the expressway had I gone with him. The driver and couple were elderly in perhaps their late 70s. They were on the way to Saitama, but would get off the expressway at a point before my destination. I asked them to take me to the Kamisato Service area which is just within the border of Saitama.

Driver and car that took me to Saitama Prefecture

The entrance of the Kanetsu tunnel, the longest car tunnel in Japan.

We passed through the Kanetsu tunnel which is the longest tunnel in Japan for vehicles. It's nearly 11 kilometers long and takes about 10 minutes to pass through at the speed limit of about 100 kilometers per hour. It would take more than 2 hours to walk through it. Gasoline trucks are not allowed through it in case of accident. The tunnel passes through the highest mountains at that point and exits in Gunma Prefecture.

Just inside the Kanetsu Tunnel

At Kamisato Service Area after a relatively short wait, a lady sitting in the passenger side of her car offered me a ride as far as Kawagoe. That was exactly the spot I hoped to get off the expressway at!

The lady was with her husband and their two elementary school children were sitting in the back. They had lived in Singapore for 3 years and could speak English! I suspected that was the reason why they picked me up recognizing me as a foreigner and probable English speaker. But though we spoke in English for a time, suddenly they both switched back to Japanese.

Couple who lived in Singapore who took me to Kawagoe.

From the Kawagoe Interchange it is only a 15 minute walk to Minami Otsuka Station, and from there only 190 yen train fare to my final destination of Sayama City. From Sayama station rather than take a 220 yen bus ride to my friend's house, I decided to hoof it and use the navigation on my Tablet PC for directions. Another 25 minutes later I was at my friend's house just before 6 p.m. the very arrival time I was shooting for.

God is good! My Lord and Savior Jesus Christ provides all my needs!

[Death by Medicine](#)

If you consider health care something that is based on the medical profession consisting of doctors and drugs, by all means see this film!

I am 65 years old and the last time I visited a doctor was at least 10 years ago, and it was a skin doctor to treat a broken cyst on my neck. Knowing what I know about drugs and medicine, I have much greater faith for natural healing methods, rest, exercise, nutritious food, herbs, essential oils, a good positive mental attitude, and especially faith in God and prayer knowing the He will keep me in good enough health as long as I am serving Him and

others.
