

Fukushima Fear Mongers Exposed

Over the past few weeks well meaning relatives and friends have sent me articles on how to prepare for the radiation from the Fukushima power plant meltdown. Some people have sent me web articles with statements from “scientists” such as Leuren Moret, full of gloom and doom calling the meltdown, “tectonic nuclear warfare” against the USA! This is **total nonsense**, hype, fear mongering, and *disinformation*. I wonder whose payroll she is on?

For the record, I never once doubted that the Japanese are more than capable of handling the nuclear power plant disaster. I am proud to live in Japan among the most wonderful people in the world. They behaved so well in the face of disaster. They are clean, decent and for the most part, honest people. You cannot deceive an honest people for long, and the Japanese government is well aware of that. Many people have their own Geiger counters, and they report that radiation levels in all populated areas are well below the danger level.

One reason why the Japanese people have such low crime, and are so honest and hardworking is because the Japanese culture was heavily influenced by New Testament teachings over 1500 years ago. This knowledge was lost when all historical records in a certain place were burned in a fire. For more information about the hidden Biblical roots of Japanese culture, please see:
