

# Dr. David Martin | Exposing the Coup D'Etat & the Plot to Steal America – In Text Format

This text was transcribed from a video I found on Rumble. If you want to listen to the video first, just scroll down to the bottom of this article. If you find any errors or typos in my transcription, please tell me so in the comments section below and I'll fix it.

Speaker: Ladies and gentlemen, please stand on your feet and greet Dr. David Martin. (Applause)

David Martin: Thank you very much. Mikki (Willis), you would you stand up, please? Many of you know me because of the work and the brilliance of this man and his team. And well, that's interesting. What you don't know, is the speech that I'm about to give is because this man is not just behind the camera. He's actually a brother. And what he did to me a few months ago was he called me and he said, "You know what?" He goes, "You presented all the facts. You've been out there in front of this thing before it was a thing." And he goes, "But there's something missing. And there's something that's missing is your humanity. What happens when I sit close to you is one thing. And what happens when you're on a stage or on a camera in an interview is a different thing." And he goes, "You need to bring the man into this presentation." So the presentation that you're hearing today is because I have a brother who holds me accountable. Mikki, Thank you. (Applause)

**COVID-19 and SARS C0v2 was a coup d'etat.** And let me be precise about what I mean by that. Sedition in the United States is actually defined very simply, by when any act is done by a conspiring party or group of parties, that its intent is to disrupt or interrupt or overtake the government of a state or a country. And under 18 US Code, the act of sedition was in fact, a coup d'etat to ensure that there would not be a democracy in 2018. Okay, and I'm going to present across the next few minutes the evidence of that. And I'm going to end my presentation with a challenge to you. Because during my presentation, the 30 minutes that I have, is going to cost two children their life because of the inaction of every attorney general in America, because of the inaction of every US attorney, and because of the inaction of every governor in this country. But my grandfather said, Never attribute to malevolence what is ignorance. So in the next 30 minutes, I'm giving every elected official the

opportunity to do the right thing. And after 30 minutes, I'm not going to give them that opportunity again. (Applause) So you got Mr. Nice Guy for 30 minutes.

Next. Now, most of you don't know the details of all of the elements. And the good news is I'm going to flip through these slides very quickly because the end of the story is the important part of the story. But for those of you who don't know, COVID is a direct result of HIV Inc. HIV Inc. was founded in 1984. Anthony Fauci was the chief architect of HIV Inc. And his goal was to use sexuality, and specifically homosexuality, as a way to indoctrinate humanity into the acceptance of a universal vaccine mandate. Now, interestingly enough, most of us didn't take the bait. And the reason we didn't is because we didn't live the lifestyles that were associated with HIV in 1984. But cunningly, by 1986, Anthony Fauci and his team at NIAID (National Institute of Allergy and Infectious Diseases) and his minions at the CDC had convinced each and every one of us that maybe we've been in a car accident, maybe we would get a transfusion, and maybe we would get AIDS, which was the justification for a universal HIV vaccine in 1984. It's gonna get nasty because I'm going to show you some real images from 1984 just to let you see that what I'm saying is not my imagination.

But in 1984, something happened. People realized that to accept a universal vaccine, we needed to create a liability shield for the manufacturers of those vaccines. And from 1984 to 1986. We actually built **the first-ever product immunity in the United States, which allowed manufacturers to kill people with intent.** And you heard what I just said, kill people with intent. Anthony Fauci was quoted himself as saying that the ultimate killer of pharmaceutical interventions with vaccines was the smallpox vaccine, which killed one in every 100,000 and injured or maimed one in every 10,000. Did you hear what I just said? Killed one in 100,000, maimed one in 10,000. And that was something that he thought he could turn into a universal vaccine for HIV in 1986. I don't know what an acceptable death rate is for you people. But an acceptable death rate for any product, anywhere in the history of humanity in my definition, is zero! (Applause)

But then, a little dirty secret came along. Somebody at the NIH (National Institutes of Health) said, "Hey, Tony, Cool your jets baby. We have this drug called AZT. And we don't want a vaccine too quickly. We want to kill people with AIDS with AZT. So let's run the clock on it in the state of North Carolina...". By the way, if you're from North Carolina, or you've done anything in North Carolina, you got tar on your heels and blood on your hands. Because the state of North Carolina since 1986 has been brought to you by HIV Inc.

That's a bummer. I think I just lost the elected officials in North Carolina. Shoot. I couldn't even make it through a presentation.

UNC-Chapel Hill began the weaponization of Coronavirus in 1986. But by 1996 Anthony Fauci had a little plan. Coronavirus, as a model, has a very interesting set of attractive attributes, which include this very interesting thing called a spike protein and a couple of other binding sites where the virus allegedly binds to the outside of the cell. And it turns out that Ralph Baric (a professor) at the University of North Carolina Chapel Hill, was the very first person to figure out how to take a pathogen, which used to be an infection of the gut, gastroenteritis. For over 30 years Coronavirus was gastroenteritis. But Ralph Baric figured out how to weaponize it and not weaponize the virus, weaponize the spike protein. And he was the one that figured out how to make **a thing that used to hit your gut, hit your heart**. That was gain of function ladies and gentlemen, the thing that we never did, allegedly. He did it! And in 1996, he received a grant and then a series of grants in 1999, by Anthony Fauci to actually weaponize the Coronavirus spike protein so it could be used as a vaccine vector with the idea that it would be the next HIV vaccine.

That's when I started watching this. I've been a locust-eating prophet in the wilderness. (Laughter) Because my first briefing on this was in 1999. My first intelligence briefing on this was in 2003, in a published document that I have sitting on my desk to remind me that sometimes being right isn't as good as being effective. Turns out I was right in 2003. And unfortunately, I wasn't effective.

But Fauci ran into another problem. And in 1999 to 2002, and patented by the University of North Carolina Chapel Hill, and conveniently in the fall of 2018, do you all remember the big Coronavirus outbreak of 2018? No, that's because there wasn't one. But in an unprecedented move, the University of

North Carolina Chapel Hill was forced to sign their SARS vaccine patent from UNC-Chapel Hill back to NIH. By the way that hasn't been done. But they did it in the fall of 2018. Does it feel like they were preparing for something?

Next slide. Do not read this slide. Because I used to hate professors who put reading charts and eye exams on slides. Don't read it with any luck, Clay Clark can figure out how to make all of this presentation available to you. And I hope he does because that's what it's for. But in 1984, we created the vaccine nightmare, and **we let Anthony Fauci have \$191 billion**. And you heard the number, right, *billion*. We've been told about \$3.7 million going to China, and we're supposed to be upset about that. How about \$191 billion of your taxpayer money that has gone to weaponize nature against humans? 191 billion, and let's do the little walk-through, shall we? 1984 we invent the **vaccines for HIV, which led to death and permanent disability to over 50% of the participants**. But that was okay because they were gay. That was okay. It gets worse. Okay. 2001 you remember the anthrax scare the domestic terrorism scare? Did anybody know that the US military in the spring of 2001 ordered 300 million doses of Ciprofloxacin? 300 million doses. Now we have a pretty compelling army in this country. But with all due respect, 300 million sounds like every citizen in America, it doesn't sound like every member of the US military. And how is it that at least five months before anthrax was released, we ordered 300 million doses of the treatment called Ciprofloxacin? And from – oh that's right – a German company called Bear.

That's by the way when I started busting these stories because it turns out that this wasn't the only pathogen that was being developed by the Department of Defense. And it was interesting because in the early 2000s, I started seeing Coronavirus show up in a bunch of DARPA contracts and a bunch of DOD contracts and I'm sitting there going, why would we be doing that? Why would we be taking a thing which was for dogs and porcine – that's pigs by the way, that's a scientific term for pigs. Think bacon and you got it. Pigs and various other vertebrates? Why would we suddenly be trying to weaponize that and make it hit human lung epithelial cells and human cardiac cells? Why would we be doing that? And why would the Defense Department be doing that? Is that where you expect to go to kind of get your kind of basic treatment programs? NO!! And you don't go there? Because it sounds like a weapon system if it's being funded by billions of dollars of Defense Department black contracts, doesn't it? Or is that Dave the conspiracy theorist?

Well, let's jump into my favorite 2016 protocol, the [AMP \(Antibody Mediated Prevention\) protocol](#). The AMP protocol has a line that I absolutely love. This was when we decided to let the University of North Carolina Chapel Hill develop the HIV vaccine. And it turns out that read what they said about this protocol, it will take place in sites, 24 sites in Brazil, Peru, and the United States and will enroll 2700 men and transgender people who have sex with men. What?! That's by the way straight out of the protocol.

If you don't believe what I say about the fact that Fauci has no concern for human life, but is more than happy to kill people who most people think shouldn't live anyhow, guess what happens? We start introducing the camel's nose under the tent and we start saying it's okay to kill people in the advancement of science. Now listen, people listen carefully. I am not

advocating for any lifestyle. But what I am saying is that when you've decided that you're playing God and that there is a person by any designation, that doesn't deserve to live, you left humanity! (Applause) Period! If any of you see my wife, you know, I'm very heterosexual and very happy. (Laughter) But that doesn't justify making a determination that somebody who doesn't share my values is worth killing in the name of HIV Inc. (Applause) Let's be clear on that. And then 2016 2019. And by the way, look at 2019, the hepatitis C vaccine, which guess what has to do with yet another sexual context story that they tried to turn into, they were killing people that are promiscuous, and usually gay and promiscuous, so we don't care about that. I'd love for some of the bleeding hearts left to actually realize that they're the ones celebrating the execution of the people who they allegedly represent. I think that would be a very interesting proposition. Because maybe somewhere along the line, we should actually go back to 1984. And look at the ghost of Anthony Fauci in this slide, by the way, if you see this slide that's on the screen, what you'll see is 1984 Anthony Fauci, no kidding. That's what he looked like in 1984. He still looked like that center from the high school basketball team.

What?! I'm going to tell you if I had to bet on a basketball team, and I knew that Anthony Fauci was the captain of that team in high school, I bet against him. And guess what, I'd bet against him now, too, because the dirty little secret is he actually made the statement, "it is quite possible. In fact, it's invariable that we will develop a vaccine for AIDS." Now, you know, sometimes there are things called Freudian slips, people say things and they didn't mean to say it. So I want to give him credit. He probably misspoke. He probably meant to say it's inevitable that we'll do it. But he didn't say that. He said, it's *invariable* that we do it. And it turns out that if you look at the definition of the word invariable, you know what it means? "I'm never going to stop doing a thing". Ah oh! You think we're talking about a COVID vaccine right now. No. We're still talking about Anthony Fauci's fantasy of an AIDS vaccine. Don't make a mistake by being fooled.

Next slide. Here's the problem. 1984. He had an epic fail. He tried to make an AIDS vaccine, it didn't work. In 2005 he tried to do H1N1, an epic fail, people died, it didn't work, people didn't roll up their sleeves, epic fail. And then a bummer of an opportunity came along. In 2018 we actually did have an influenza pandemic. We had a lot of people that died. And guess what we didn't do. We didn't shut down countries. We didn't shut down borders. We didn't shut down schools or churches or anything else. We just let people die. And it was seen inside of NIAID as a lost opportunity. Dead people was a lost opportunity. So what he did was he figured out something and he gave the University of North Carolina Chapel Hill a grant to create a pathogen. So that we could actually get, and I'm quoting, "the public to accept the need for a pan coronavirus vaccine. We need the media to create the hype to get to the real issues. We need to use that hype to our advantage. Investors will follow if they see profit at the end of the process."

finger at Donald Trump, the best you can do is say he was subjected to corruption and maliciousness and treason and traders within his circle. That's true. But when he signed this, he did not know the cost. He did not know. And the persons who did know was the lobby, the pharma lobby, the single largest donor in US history to political campaigns. They were the puppets that actually put that paper in front of Donald Trump. And **Alex Azar was the executive responsible for the death and destruction of America.** And you have not even heard his name. Because criminals like to put other people upfront. Well, they hide in the shadows. Well, guess what, we're not going to let happen today. A lobbyist turned executive, turned architect of oh my gosh, under the Bush administration, Alex Azar was the one who also came up with the prep Act, which actually shielded companies from liability in the event of a national emergency. **Alex Azar is the perpetrator of the largest genocide this country has ever seen.** And you do not know his name. But that just changed today. (Applause)

Oops, that was my out-loud voice. And it turns out, he's the boss of Anthony Fauci. He's the boss of CDC. He's the boss of NIAID. He's the boss of NIH (National Institutes of Health). He's the boss of the FDA. And guess what? He's the first guy that the FBI should cuff, lock up, and put in prison for the rest of his life! (Applause) That's our target. And don't think I'm actually advocating justice for the sake of justice. I'm advocating justice, because the minute we actually have the first felony conviction, the first time the emergency use authorization vanishes, because it turns out the emergency use authorization cannot stand if the basis of it was a felony. And that's written into the law. We have one focus. We have one silver bullet. And I am waiting for one AG (Attorney General) in this country to stand up and be accountable for the lives that are being lost because well, I'm talking, two children died because they're being murdered by a collusion racket. Which is like having Al Capone drive through the streets of Chicago and shoot into a school. You wouldn't sit for that but you have sat for this. Well, guess what? Not after this. From now on every hour that you do not follow the instructions I have at the end of this speech, for every hour that you don't take action, another two children die. And I want you to go to bed tonight asking yourself, did you pay attention? Or Are you cool with two kids dying every hour? I want you to sleep on that. I want you to sleep with that. Because on my watch, that ain't gonna happen.

Now I may be David and I may have a couple of river stones, which I'm going to share with you. And we got a Goliath that we got to work with. That's okay. But let's do the next slide because I got a punch line. And I'm going to get on schedule, in fact ahead of schedule. I'm going to end early to respect the next speakers. So here we go. That slide. Here's the deal, guys, you're going to share this slide, so I don't have to talk about it right? We're going to figure out a way to share the slide. Awesome. So you don't, I don't have to talk about it. Because I do have to talk about this.

There are two websites right now by any grace of God in the next five minutes or 10 minutes or hour, there's gonna be 100 websites like this, because what I conveniently did for every attorney general for every US Attorney for every law enforcement agent in this country, what I did was I went ahead and

drafted the indictment notice. (Applause) The United States of America v. And let's read it out because that's all the time I have.

United States of America V

- Alex Azar defendant
- Anthony Fauci, defendant
- Peter Daszak, defendant
- Ralph Baric, defendant
- FDA, defendant
- CDC defendant
- NIAID, defendant
- Moderna defendant
- Pfizer defendant

We are going to do the following, you're going to go to that website, [DavidMartin.world](http://DavidMartin.world) or [fullyliveacademy.com](http://fullyliveacademy.com), there's a button that says AG document, you are going to print that document and you're going to deliver it to every attorney general in every state, you're going to deliver it to every US attorney, you are going to put them on notice that from this day forward, and literally from this minute forward, every death is on their hands, because they can do something about it. And they have chosen now four times in four meetings, they have chosen to say, "Dave, this is a political, not a legal issue." And that's a quote from AGs offices. **Make it a legal issue.** And if they haven't made it a legal issue, if you haven't heard that an AG met with me, make it a political issue next year. Because this is our country, these are our children, and we will not let them die on our watch. (Applause)

Ladies and gentlemen, we the people can do something. You now are entrusted with much. And to quote that beautiful narrative in the Gospels. When you have been entrusted with much even more is required. Guess what? I just gave you the river stones. There's an eight-count indictment, all felonies, all punishable by up to 99 years in prison, and up to \$100 million, fine. And, and I'm going to tell you today that anybody who works with me on this case has to agree to the following. All of the proceeds that we get from the collections of this lawsuit, and I mean, all of them are going to go to a Vaccine Injury Fund that does not require anyone to prove that the vaccine did anything. Because it turns out that every mother, every father that has a vaccination injured child, whether it was caused by it or associated with it, those people need our help. And every dollar that is ever collected is going to go to make sure that we the people honor the fact that real humans have suffered under the hands of a colluding set of conspirators who now it's on us to make sure go away forever.

Ladies and gentlemen, you can do it. And today, right after this speech, Mikki Willis and I are going to go back to the booth up there. And we are going to sign books together. So the Plandemic books if you want them, Mikki and I'll be back there. We'll be happy to sign your books. And listen people, we can do this together. You now have been entrusted with much, even more is required. Thank you very much. God bless you.

---

## Messenger RNA Vaccines May Cause Damage to the Cardiovascular System

### **Transcript of Dr. Bridle interview on *On Point* with Alex Pierson**

Alex Pierson: Talking about a lot of science these days! It's coming out as fast and furious. And a lot of people asking a lot of good questions, you know, the vaccines, are they safe for kids? Certainly, there's a big push to get kids as young as 12 the shot as soon as possible, but, but everyone's confident about it, even if you're not an anti-vaxxer, there are a lot of parents who are kind of nervous about putting something into their kids.

And then I read that there have been several dozen cases of heart problems in teens and young adults, which Israel is now looking into. And what they're looking into which they'll release the results of are why mostly males, not all, but around 22 years of age and younger, are getting heart inflammation. So one to four days after getting a shot, they get shortness of breath, fatigue, and some very specific chest pain. It's mild, so no one's gotten really sick or died. But you want to know what you don't know if you're going to put something into your kids.

Let us bring in Dr. Byram Bridle. He's an associate professor of viral immunology at the University of Guelph (Ontario, Canada). Doctor, you've been very, you know, very open on this whole issue. And you know, you're not an anti-vaxxer by any stretch, but what do you think about this inflammation in the heart, and is it an actual threat?

Dr. Bridle: Yeah, thanks for having me on, Alex. Yeah, as you said, I'm very much pro-vaccine, but always making sure that the science is done properly, and that we follow the science carefully before going into public rollout of vaccines. I hope you'll run let me run with this a little bit, Alex. I'll forewarn you and your listeners that the story I'm about to tell is a bit of a scary one. This is cutting-edge science.

There's a couple of key pieces of scientific information that I have become

privity to just within the past few days that has made the final link. So we understand now, myself and some key international collaborators, we understand exactly why these problems are happening. And many others associate these vaccines. And the story is a bit of a scary one. So just to brace you for this, but I'm going to walk you through this. The science that I'm gonna be talking about. I don't have the time here to describe exactly the scientific data. But let me assure you that everything that I'm stating here that I'm gonna state right now is completely backed up by peer-reviewed scientific publications, and well-known and well-respected scientific journals.

I have all of this information in hand, I'm in the process of mildly trying to put it all into a document that I can hopefully circulate widely. So your listeners are going to be the first to hear the public release of this conclusion, and I can vouch for the science. So this is what it is.

The SARS-coronavirus 2 has a spike protein on its surface. That spike protein is what it allows it to infect our bodies. That is why we have been using the spike protein in our vaccines. The vaccines we're using get our cells in our bodies to manufacture that protein. If we can mount an immune response against that protein, in theory, we can prevent this virus from infecting the body. That's the theory behind the vaccine. However, when studying the disease, severe COVID-19, everything that you've just described heart problems, lots of problems with the cardiovascular system, bleeding and clotting is all associated with severe COVID-19.

And looking and doing that research, what has been discovered by the scientific community is the spike protein on its own is almost entirely responsible for the damage to the cardiovascular system if it gets into circulation. Indeed, if you inject the purified spike protein into the blood of research animals, they get all kinds of damage to the cardiovascular system, and it can cross the blood-brain barrier and cause damage to the brain.

Now at first glance, that doesn't seem too concerning because we're injecting these vaccines into the shoulder muscle. The assumption all up until now has been that these vaccines behave like all of our traditional vaccines that they don't go anywhere other than the injection site, so they stay in our shoulder. Some of the protein will go to the local draining lymph node in order to activate the immune system. However, this is where the cutting edge science has come in this and this is where it gets scary.

Through a request for information from the Japanese regulatory agency, myself and several international collaborators have been able to get access to what's called a bio-distribution study. It's the first time ever that scientists have been privy to seeing where these messenger RNA vaccines go after vaccination. In other words, is it a safe assumption that it stays in the shoulder muscle?

The short answer is absolutely not. It's very disconcerting.

The spike protein gets into the blood, circulates through the blood in

individuals, over several days post-vaccination. It accumulates once it gets to the blood and accumulates in a number of tissues such as the spleen, the bone marrow, the liver, the adrenal glands. One particular concern for me is it accumulates at quite high concentrations in the ovaries. And, and then also a publication that was just accepted for a scientific paper just accepted for publication that backs this up, looked at 13 young healthcare workers that had received the Moderna vaccine which is the other messenger-RNA-based vaccine we have in Canada. And they confirm this They found the spike protein in circulation in the blood of 11 of those 13 health care workers that had received the vaccine.

What this means is, so we have known for a long time that the spike protein is a pathogenic protein, it is a toxin, it can cause damage in our body if it gets into circulation. Now, we have clear cut evidence that the vaccines that make our bodies, our muscles or the cells in our in our deltoid muscles, manufacture this protein, that the vaccine itself, plus the protein gets into blood circulation. When in circulation, the spike protein can bind to the receptors that are on our platelets and the cells that line our blood vessels.

When that happens, it can do one of two things. It can either cause platelets to clump, and that can lead to clotting. That's exactly why we've been seeing clotting disorders associated with these vaccines, it can also lead to bleeding. And of course, the heart involved. It's part of a key part of the cardiovascular system. That's why we're seeing heart problems.

The protein can also cross the blood-brain barrier and cause neurological damage. That's why also in the fatal cases of blood clots many times is seen in the brain. And also of concern is there's also evidence of a study – this has not yet been accepted for publication yet, this one – they were trying to show that the antibodies from the vaccine get transferred through breast milk. And the idea was this may be a good thing because it would prefer some passive protection to babies. However, what they found inadvertently was that the vaccines, the messenger RNA vaccines, actually get transferred through the breast milk. So the delivering the vaccine vector itself into infants that are breastfeeding. Also what this note we know spike protein gets into circulation, any proteins in the blood will get concentrated in breast milk. Looking into the adverse event database in the United States, we have found evidence of suckling infants experiencing bleeding disorders in the gastrointestinal tract.

Alex Pierson: So okay, let me pause you there. There are only about 45 seconds left.

Dr. Bridle: Sure, I'll wrap it up this message.

So this has implications for blood donation. Right now Canadian Blood Services are saying that people who have been vaccinated can donate. We don't want the transfer of these pathogenic spike proteins to fragile patients who were being transfused with that blood. This has implications for infants that are suckling. And this has serious implications for people for whom SARS Coronavirus 2 is not a high-risk pathogen, and that includes all of our

children.

In short, the conclusion is, we made a big mistake, we didn't realize it until now, we thought the spike protein was a great target antigen, we never knew the spike protein itself was a toxin and was a pathogenic protein. So by vaccinating people, we are inadvertently inoculating them with a toxin. And some people this gets into circulation. And when that happens in some people, they can cause damage, especially in the cardiovascular system. And I have many other, I don't have time, but many other legitimate questions about the long term safety, therefore, of this vaccine, for example, with it accumulating in the ovaries, one of my questions is, will we be rendering young people infertile, some of them infertile? So I'll stop there. I know it's heavy heading...

Alex Pierson: I'm up against the clock. I need like an hour when I talk to you because you have so much information and of course your one opinion of many, but you know, it's interesting because you have a different look at it. And certainly, the time will tell on this but we'll have you on again because I always get an interesting and different perspective from you. Doctor, thank you.

Dr. Bridle: It was my pleasure. Take care.

---

## [Will the Covid-19 Moderna Vaccine Create Transhumanism?](#)

Dr. Carrie Madej, DO is an Internal Medicine Specialist in McDonough, GA and has over 19 years of experience in the medical field. She graduated from Kansas City Univ Of Medicine Bioscience College Of Osteopathic Medicine medical school in 2001. She is affiliated with Southern Regional Medical

Center. (Reference:

<https://www.healthgrades.com/physician/dr-carrie-madej-y7thx> )

This article is all about the dangers of a new experimental vaccine for COVID-19 from a company called Moderna. Even if Youtube bans this video, the text will remain! And if the video is banned, if you tell me about it, I'll post it directly on my own server.

So what do you think about going from Human 1.0 to Human 2.0? And what does that mean? Well, going from humans as we now know ourselves to human 2.0 has something to do with transhumanism. If you're not familiar with that term, it's about taking humans as we know ourselves and melding with artificial intelligence. It's kind of like being in the matrix if you've ever seen that movie. And that may seem kind of cool to you. We might have some superhuman abilities, maybe be able to think of something and it happens, maybe have some physical abilities that would be almost super human-like. That's the idea, that's what you see in sci-fi movies.

And for myself, thinking about this topic I'm like, well I have some time I think that's many years in the future. However, this question, this idea is now right at this moment. We need to make a decision. And I found out that we need to make a decision about this because I investigated the proposed COVID-19 vaccine. And this is my alarm call to the world.

I looked at the pros and cons and it frightens me. And I want you to know about this. You need to be very well informed because this new vaccine is not like your normal flu vaccine. This is something very different. This is something brand new. This is something completely experimental on the human race. And it's not just about being a different vaccine there are technologies that are being introduced with this vaccine that can change the way we live, who we are, and what we are, and very quickly.

I think that you know some people that you might know these names Elon Musk who is the founder of SpaceX and Tesla automotive, as well as Ray Kurzweil who is one of the bigwigs of Google. These are self-proclaimed transhumanists. They believe that we should go to Human 2.0 and they are very big proponents of this. There's a lot of other people that you might know their names, they're also involved with this so you should look that up.

I think the easiest way to explain this to you is to go with one of the front runners for the vaccine and go into a little bit of the history and tell you how they want to make the vaccine, and I think that will speak volumes. So for instance Moderna is one of the front runners for the COVID-19 vaccine. You should know that Moderna was founded by a person from Harvard, Derrek Rossi, and this researcher actually was successful in taking some modified RNA and being able to reprogram a stem cell in the body and change the function of the stem cell. He actually made it genetically modified, okay? So you can – he proved – that you can genetically modify something by using modified RNA. So they founded the company Moderna on this concept. It's kind of a new kid on the block, okay, it's not been around that long. In fact, it hasn't even made any vaccine for a human before. It's made no medicine for a

human before. This will be their first run.

You must know that Moderna was in the news recently because it really fast-tracked, it's like the other companies, it's fast-tracking the vaccine. It's going from phase one to phase two very very quickly. In fact, it's gone from phase one to phase three and its experiments from March of this year until currently. I mean that is unbelievable! It usually takes five or six years! How are they able to do this with the safety and efficacy data that we need?

And I want you to know that in phase 2 we only use between, they're only using between 30 and 45 humans. In Moderna's test study they only used 45 humans. And with the high dose vaccine group, they got 100 percent of those people got systemic side effects, 100! That's only in the short side effect profile. In the low dose vaccine, 80 percent got systemic side effects. Now we don't even know the long-term side effects from that. We would need a lot longer time, right? Maybe years. But we do know based on previous animal studies of using this technology that you can expect possibly increased cancer rates, increase mutant genes, mutagenesis, also increased autoimmune reactions. For instance, in some of the ferret studies they saw that when the ferret was introduced to the virus that they were trying to protect the ferret from after the ferret got the vaccine they actually had an exaggerated immune response, it actually hurt the ferret. They had more lung inflammation, more lung fluid, even some problems with their liver. It actually hurt them. They had a poorer response.

Okay, so this those are longer-term reactions and that could be seen with this vaccine, but we don't know the data yet. So it's not without risk. And how are they doing this? Well, they're actually suggesting to use a platform, let me just explain how they would administer the vaccine. So the vaccine there's an idea called micro-needle platform, okay, this was developed by MIT, and they said it could be very easily produced, okay, and mass-produced. This is why they're proposing this technology, and many millions of vaccines could be made quickly. They could also be administered by yourself. So the idea is to get a band-aid, it looks like a band-aid that you buy in the drugstore, it's shipped to you through Amazon or UPS or some other shipping service. You take it out of the package, you put it on your hand like this, and then you take the sticker off, and voila you've been vaccinated.

So how is that possible? Well in this band-aid, it has little tiny spicules little tiny needles. And this was designed after a snake viper fang bite, okay, or snake viper bangs, little snake bites. Anyway, in these tiny little spicules, they claim you won't really feel it that much, there's their little Hydrogel, it's a material called Hydrogel. Inside the Hydrogel would be a Luciferase enzyme as well as the vaccine itself.

So what is all that? So first of all, you're getting the vaccine. It's modified RNA or modified DNA. Let's take Moderna, modified RNA. So in that modified RNA, the idea is that the micro-needles would puncture into your cell membrane, and this synthetic piece of an RNA, it's a code for the part of the virus, where they could use a synthetic DNA to code for the part of the virus would go into your nucleus. Your body would start transcribing it, would start reading it, and making more of that part of the virus. Well, why

would we want to make more of the virus or part of the virus? The idea is your body would get used to seeing it, would know how to make antibodies, and would have an improved T-cell response. And the idea is then when you saw it in the future your body would already know how to fight it and it would be a better response, that's the idea.

The problem with that is they're using a process called transfection. And transfection is a way that we make genetically modified organisms. I think you know about those fruits and vegetables. They're not as healthy as the normal wild type fruit and vegetables. So possibly you could extrapolate that to a human. If we become genetically modified, we would not be as healthy. We don't have long-term studies on this anyway, this is unbelievable. And you know, the vaccine manufacturers have made the statement this will not alter our DNA, our genome. I say that is not true, because if we use this process to make a genetically modified organism, why would it not do the same thing to a human? I don't know why they're saying that.

Now if you look at the definition of transfection, it'll tell you that it can be a temporary change in the cell, and I think that's what the vaccine manufacturers are banking on, it's temporary. Or, it's a possibility for it to become stable, to be taken up into the genome, and so stable that it will start replicating when the genome replicates meaning, it is now a permanent part of your genome. That's a chance that we're taking. So it could be temporary, or it could be permanent. And we would never know that for years down the road, honestly.

So, here we go, we've got something that can alter our genome. It's a possibility. And another thing on that, if they're altering the genome, what would be the effects? I told you previously some of the side effects, but also we need to know that this is a synthetic piece of DNA or RNA, and if it becomes taken up into the genome of a human, it's synthetic, it's not from nature. And if you look at the Supreme Court justice ruling on synthetic DNA or genes, it can be patented. And patents have owners.

So what does that mean for us? What if this gets into our genome? Does that mean Moderna or the Bill and Melinda Gates Foundation, or the Department of Defence, all of these people who are involved in the patents, are they somehow going to own part of our genome? It's a possibility. You need to know that.

So that's one part of this delivery system, just one. Now let me go to the next. The next part of the delivery system is a Luciferase enzyme. They named it, they patented it Luciferase. I don't like that name Luciferase, because it has bioluminescent qualities which means it can produce a light or has a light source. And all of this would be under your skin and you cannot see it. Now the Luciferase is an idea because they want to make sure that you're vaccinated. They don't trust medical records, they don't trust you saying that you got vaccinated, they want to make sure, they want to make sure it was successful, a successful transfection, a successful gene modification. So when you get the Luciferase enzyme if you have an iPhone or special app on the iPhone, you can scan over that area and it will give a digital code, a digital imprint, a digital pattern, something that will identify that you

were vaccinated. It holds your vaccination record. It also gives you an ID, a number, a bar code, a branding, whatever you want to call it, a tattoo, it's all the same thing. You now become like a product.

So we have that. Now the third thing I mentioned was Hydrogel. So Hydrogel is actually an invention from DARPA, the Department of Advanced Research Projects Agency. This is kind of a sci-fi kind of a group from the Department of Defense, Pentagon, of the US government. They make these fantastic inventions. So one of them is Hydrogel.

Hydrogel, you can look on Youtube, look at PROFUSA, it is one of the companies, DARPA, as well as Hydrogel, and you'll find some little two-minute clips that they describe. So Hydrogel's nanotechnology: microscopic little robots, and these little robots, actually I know it sounds crazy, it's still crazy to me, but it's possible, they can disassemble, reassemble, assemble, into and make different things. So with this Hydrogel, it's really nano technology, so that's something you know robotic or something that's artificial intelligence, it has the ability to connect with artificial intelligence.

So this means that a human can now connect to directly and gather information from our bodies, and gather it and connect with your Smartphone, with the cloud, with some other smart device. And once this is done, this is 24 hours a day, seven days a week, 365 days a year. Think about that. think about how immediately that could change our privacy, immediately can change our autonomy, immediately change our freedoms. That can gather data like your blood sugar, your oxygen, your blood pressure, those sound great, but it also can gather many other things. It can gather they say your emotions, or your menstrual cycle, your activity, if you've fallen, your nutrients in your body, if you took medicines. It's a potential to see if you took illicit drugs, it's got a potential to see almost anything that goes on in your body. And all of this information is going where? That has not been addressed. Who's protecting this information? What are they using it for? This is really serious stuff, guys! This is all being proposed to being unveiled in the next vaccine.

The other thing to know is with this nanotechnology, Hydrogel, artificial intelligence, you know, hook up just like your cell phone. You can send a text message you can send an email but also you can receive them back. So that means we could receive information. What information would be coming back into us? Would it affect our mood? Our behavior? Would it affect how we think or our memories? If you haven't watched the movie Matrix, I think you should. I think there's some truth in that movie. I see so many wrong things with this vaccine. And I see that we are not talking about it in the major media. And I see that I feel that these companies are outright lying to us when they say they cannot affect our DNA, because by all definitions that they are using, this can affect our DNA.

So guys I wanted to make this video short because I wanted to get the point across. I wanted you to really do your own research. So know that there are many risks that we're seeing here and there is some we really need to know if we really want to go from human 1.0 to human 2.0.

And let me also tell you that there are some major names behind these vaccines. You're always going to see like the Department of Defense from the US government, sometimes DARPA like I told you. Why is the military involved with our vaccines? You see the Bill and Melinda Gates foundation everywhere with this. If you look you'll find that name almost always.

And let's go back to the Bill and Melinda Gates Foundation. I want you to look up, what, let's look at the track record, let's look at what that man stands for. His family comes from a family of eugenics. What does eugenics mean? Population control, meaning there are too many people on the planet. It's important to know. He's been on video stating that he thinks with a very good new vaccine we could get the earth's population to be decreased by 10 to 15 percent. Well, who's going to stay and who's going to go? And who is he to decide? He doesn't have a medical background, no epidemiology background, no science background. He's not a doctor. A software tech that's what he is.

I'd also like you to realize I always look at who has a vested interest. What are their motivations? What is his motivation? Right? We already know his family background. Well, what's great concerning to me is that DARPA, this military agency, as well as the Bill and Melinda Gates Foundation, is very interested in something called gene drive research or technology, or gene extinction technology. And it's exactly what it sounds like. By using genetic mutations, by use of transfection, for instance, you can exterminate an entire species from the planet. They are proposing to use this for mosquitoes, for instance, in Africa. But guys, our world is a delicate ecosystem. Who is saying one species goes? You destroy one species, you could affect an entire ecosystem. So when you exterminate an entire species you will affect an entire ecosystem. It's a very delicate balance. And who is to say who's going to stay and who's going to go? Who's got that knowledge? Why aren't we talking about this? And guys, if we can do it to an insect, we can do it to an animal, we can do it to a human. I bring this up because if these agencies that are behind the vaccine also stand for that, do you trust them with your health? Do you trust them with your family? Do you trust them with our children?

The other thing is we're rushing this to production. What is the motivation behind that? We need to really think about this.

I've also stated in the past that we need to know that there are at least in the United States there are mandates passed that make the vaccine manufacturers have no liability, zero liability for any harm done to any human. If people are killed, if they're hurt, if they're paralyzed, if they're maimed for life, it doesn't matter. You have no recourse. And they still make all their profit. So there's no incentive for them to make it safe anyway.

I also want you to know that one of the mandates the emergency preparedness act that's that says they can force a vaccine on us. They cannot force a vaccine if there is a viable treatment for the COVID-19. And I want you to know that doctors around the world are being censored about treatment options for COVID-19 or prevention for COVID-19. Because if there's a true treatment or prevention then they can't force this vaccine on us. I want to bring that

up because what in the world is the motivation of doing this? Is it really in the health of all of us? As a doctor, I can't see how this is in the true health of the entire world. I think there's another motive, another agenda going on. The more I look at this the more that comes up.

So I'll leave you with this. I want to make this short and sweet, sweet so that you can digest this and think about it. Do you really want to go to Human 2.0? I don't think it's the fantasy you see in the movies. We need to come together, and we need to unify our voices because people in positions of power taking care of our health are not in our best interests. But together we have power. Together united our voice is strong. So I encourage you to do critical thinking. Do your own research. Join groups in your State. Go to your state legislature and you tell them no, no to these experiments on humans, no to an invasion of privacy, no to censorship. We are sovereign human souls and we need to take our rights back.

Thank you for listening. And you know, I always say my videos with the greatest of love and the greatest of peace. Thank you.
